

## Personal information

<b>First and Last name</b>	Pietro Ferrara
<b>Date and place of birth</b>	Mirano –VE–, 09/04/1981
<b>Citizenship</b>	Italian
<b>Website</b>	<a href="http://www.pietro.ferrara.name">http://www.pietro.ferrara.name</a>
<b>DBLP</b>	<a href="http://dblp.uni-trier.de/pers/hd/f/Ferrara:Pietro">http://dblp.uni-trier.de/pers/hd/f/Ferrara:Pietro</a>
<b>Google Scholar</b>	<a href="https://scholar.google.com/citations?user=y1SCHOEAAAAJ&amp;hl=en">https://scholar.google.com/citations?user=y1SCHOEAAAAJ&amp;hl=en</a>
<b>E-mail</b>	<a href="mailto:pietro.ferrara@gmail.com">pietro.ferrara@gmail.com</a>
<b>Language skills</b>	Italian (mother language) English (good spoken/written) French (good spoken/basic written)

## Career

- 02/2016** →**Today** **Head of the Scientific Core Lab and Research Scientist** at Julia SRL, Verona Italy.  
Duties:
- Research:
    - Extend Julia to .NET programs
    - Various extensions to the scientific core of the Java analyzer
    - Supervision of internsThis lead to the publication of 1 and the writing and submission of other 2 scientific papers.
  - Scientific community: Program committee member of one workshop and an artifact evaluation, reviewer for various international conferences.
  - Technical support: extensions of the functionalities of the Eclipse plugin, automatic generation of documentation in HTML and pdf formats from textile and markup files.
  - Commercial support: presentation of Julia to various potential customers (Unipol, FCA, Vittopiria Assicurazioni), partial support during Proof Of Concepts activities with potential customers, preparation of technical documentation about the peculiarities of the product, assistance to the communication activities through various blog posts, preparation of technical tutorials and commercial videos.
- 07/2013** →**12/2015** **Research Staff Member** at IBM Thomas J. Watson Research Center in Yorktown Heights, NY, U.S.A.  
Duties:
- Research: Apply static and dynamic analysis to security properties of mobile software (mostly privacy properties in Android) by developing various tools to detect violations at compile or run time. This effort already lead to about 10 publications (one awarded as an ACM Distinguished Paper), and an IBM Research Accomplishment Award.
  - Community: Program committee member of 2 conferences, demo co-chair at OOPSLA 2015, reviewer for 10 international conferences or journals, interviewer of various Software Engineer and Research Staff Member candidates at IBM Research.

- 04/2009**     **Lecturer** (02/12-07/13) and **Postdoc** (04/09-01/12) at ETH Zürich, Switzerland  
**→07/2013**     Supervisor: Peter Müller (Full professor, ETH Zürich)  
 Duties:
- **Research**: Design and implement a novel generic static analyzer (Sample) combining various value and heap analyses. 4 PhD and 6 master/bachelor students extended Sample with novel analyses. Overall, this effort lead to 10 publications in international journals and conferences. Sample currently supports various languages (namely, Scala, Chalice, and TouchDevelop), and many value (e.g., numerical) and heap (e.g., pointer and shape) analyses.
  - **Funding**: Actively participate to the writing of two project proposals (600'000CHF in total, equivalent to about 580'000\$), and to their development as technical head and co-principal investigator.
  - **Teaching**: Lecturer of a master course on static program analysis. Teaching assistant (teaching exercise sessions and evaluating final written exams or projects) various times for 3 different courses (both at bachelor and master level) on object-oriented programming languages, formal methods, and program verification. Supervise 3 master and 2 bachelor theses.
  - **Community**: Program committee member of 3 conferences, external reviewer for 20 international journals and conferences, interviewer of about 30 candidates for PhD positions at ETH

## Education

- 10/2005** → PhD degree in Computer Science  
**22/05/2009** Ecole Polytechnique (Paris) and Università Ca' Foscari (Venice)  
Subject: "Static analysis via abstract interpretation of multithread programs"  
Advisors: Radhia Cousot (research director, CNRS/Ecole Normale Superieure) and Agostino Cortesi (full professor and head of the Department of Computer Science, Università Ca' Foscari of Venice)  
Reviewers: Manuel Hermenegildo (full professor, Universidad Politécnica Madrid) and Helmut Seidl (full professor, Technische Universität München)  
Examiners: Eric Goubault (research director, CEA) and Francesco Logozzo (researcher, Microsoft Research)  
 Defended at Ecole Normale Superieure of Paris on May 22<sup>nd</sup>, 2009.
- 2003** → **Master degree in Computer Science**  
**2004** *Laurea specialistica in Informatica, Università Ca' Foscari of Venice*  
Subject: "Development of a static analyzer for object oriented languages and application to the firewall analysis of JavaCard"  
Advisor: Prof. Agostino Cortesi.  
Co-advisor: Dr. Francesco Logozzo (Ecole Polytechnique, Paris).  
**110/110 cum laude**
- 2000** → **Bachelor degree in Computer Science**  
**2003** *Laurea in Informatica, Università Ca' Foscari of Venice*  
**110/110 cum laude**
- 1995** → **High school degree – Studies of Science**  
**2000** *Diploma di maturità scientifica, Liceo Scientifico Statale "G. Bruno", Mestre*  
**94/100**

## Research Interests and Vision

My research interests are focused on the application of rigorous mathematical theories to enhance the reliability, security, and performances of software by means of static analysis. Abstract interpretation is a framework applied to develop sound static analyses proving properties on all possible executions of a program. However, approximation is necessary to achieve computability, and the analysis might produce false alarms. Finding a good balance between precision, efficiency, and soundness depends on specific applications, and it usually requires deep research investigation. I am particularly interested in new scenarios where static analysis might have a relevant impact, and I have focused my recent research activity on mobile and .NET software.

**Keywords:** abstract interpretation, static analysis, mobile programs, software engineering, program verification, multithreading, security.

## Awards, Honors and Fellowships

- 10/15** IBM Research Accomplishment for “Fundamental Contributions to Science or Technology” to “Program Analysis and Programming Languages for Mobile”
- 07/14** ACM SIGSOFT Distinguished Paper Award at ISSTA 2014
- 07/12** Invited to the Microsoft Research Faculty Summit 2012
- 10/08 → 12/08** French Ministry of Foreign Affairs Fellowship for my PhD thesis
- 05/06** Vinci fellowship of Italian-French University “italo-francese” for my PhD thesis
- 02/06** 2<sup>nd</sup> prize at Clusit 2006 for my master thesis

## Publications

### Journals

- [Ferr16]** P. Ferrara: “A generic framework for heap and value analyses of object-oriented programming languages”, *Theoretical Computer Science*, Volume 631, pages 43-72, June 2016  
(ERA: A)
- [CFC15a]** A. Cortesi, G. Costantini, and P. Ferrara, “The Abstract Domain of Trapezoid Step Functions”, *Computer Languages, Systems & Structures*, Volume 43, pages 41-68, October 2015
- [CFC15]** G. Costantini, P. Ferrara and A. Cortesi, “A Suite of Abstract Domains for Static Analysis of String Values”, *Software: Practice and Experience*, Volume 45, Issue 1, pages 245–287, February 2015  
(ERA: A, AM Journal: 56<sup>th</sup>/376)
- [Ferr13]** P. Ferrara, “A generic static analyzer for multithreaded Java programs”, *Software: Practice and Experience*, Volume 43, Issue 6, pages 663–684, June 2013  
(ERA: A, AM Journal: 56<sup>th</sup>/376)

### International conferences

- [APT17]** A. Aydin, D. Piorkowski, O. Tripp, P. Ferrara and M. Pistoia: “Visual Configuration of Mobile Privacy Policies”, in *Proceedings of the 20th International Conference on Fundamental Approaches to Software Engineering (FASE 2017)*, ARCoSS, LNCS, Springer, Uppsala, Sweden, April 22-29, 2017  
(acceptance rate: 26%, MS SE: 29<sup>th</sup>/285, AM PLSE: 32<sup>th</sup>/342)

- [FTLK17]** P. Ferrara, O. Tripp, P. Liu, and E. Koskinen: “Using Abstract Interpretation to Correct Synchronization Faults”, in Proceedings of the 18th International Conference on Verification, Model Checking, and Abstract Interpretation (VMCAI 2017), ARCoSS, LNCS, Springer, Paris, France, January 15-17, 2017 (MS SE: 34<sup>th</sup>/285, AM PLSE: 8<sup>th</sup>/342)
- [TPT16]** P. Tsankov, M. Pistoia, O. Tripp, M. Vechev, and P. Ferrara: “FASE: Functionality-Aware Security Enforcement”, in Proceedings of the 31st ACM Annual Computer Security Applications Conference (ACSAC 2015), ACM Press, Los Angeles, USA, December 7-11, 2015 (CORE: A, acceptance rate: 24%, MS SP 12<sup>th</sup>/138, AM SP: 17<sup>th</sup>/97)
- [FTP15]** P. Ferrara, O. Tripp, and M. Pistoia, “MorphDroid: Fine-grained Privacy Verification”, in Proceedings of the 31st ACM Annual Computer Security Applications Conference (ACSAC 2015), ACM Press, Los Angeles, USA, December 7-11, 2015 (CORE: A, acceptance rate: 24%, MS SP 12<sup>th</sup>/138, AM SP: 17<sup>th</sup>/97)
- [BFTP15]** L. Brutschy, P. Ferrara, O. Tripp, and M. Pistoia, “ShamDroid: Gracefully Degrading Functionality in the Presence of Limited Resource Access”, in Proceedings of the 30th ACM Conference on Object-oriented Programming (OOPSLA 2015), ACM Press, Pittsburgh, USA, October 27-30, 2015 (CORE: A\*, acceptance rate: 25%, MS SE 4<sup>th</sup>/285, PL: 4<sup>th</sup>/168, AM PLSE: 5<sup>th</sup>/342)
- [BCF15]** G. Barbon, A. Cortesi, P. Ferrara, M. Pistoia and O. Tripp, “Privacy Analysis of Android Apps: Implicit Flows and Quantitative Analysis” (*invited paper*), in Proceedings of the 14th International Conference on Computer Information Systems and Industrial Management Applications (CISIM 2015), LNCS, Springer, Warsaw, Poland, September 24-26, 2015
- [FMN15]** P. Ferrara, P. Müller and M. Novacek, “Automatic Inference of Heap Properties Exploiting Value Domains”, in Proceedings of the 16th International Conference on Verification, Model Checking, and Abstract Interpretation (VMCAI 2015), ARCoSS, LNCS, Springer, Mumbai, India, January 12-14, 2015 (MS SE: 34<sup>th</sup>/285, AM PLSE: 8<sup>th</sup>/342)
- [CFPT15]** A. Cortesi, P. Ferrara, M. Pistoia and O. Tripp, “Datacentric Semantics for Verification of Privacy Policy Compliance by Mobile Applications”, in Proceedings of the 16th International Conference on Verification, Model Checking, and Abstract Interpretation (VMCAI 2015), ARCoSS, LNCS, Springer, Mumbai, India, January 12-14, 2015 (MS SE: 34<sup>th</sup>/285, AM PLSE: 8<sup>th</sup>/342)
- [BFM14]** L. Brutschy, P. Ferrara, and P. Müller, “Static Analysis for Independent App Developers”, in Proceedings of the 29th ACM Conference on Object-oriented Programming (OOPSLA 2014), ACM Press, Portland, USA, October 20-24, 2014 (CORE: A\*, acceptance rate: 28%, MS SE 4<sup>th</sup>/285, PL: 4<sup>th</sup>/168, AM PLSE: 5<sup>th</sup>/342)
- [TFP14]** O. Tripp, P. Ferrara and M. Pistoia, “Hybrid Security Analysis of Web JavaScript Code via Dynamic Partial Evaluation”, in Proceedings of the International Symposium on Software Testing and Analysis (ISSTA 2014), ACM Press, San Jose, USA, July 23-25, 2014. (CORE: A, acceptance rate: 28%, MS SE: 24<sup>th</sup>/285, AM PLSE: 4<sup>th</sup>/342)  
**ACM SIGSOFT Distinguished Paper Award**
- [FSB14]** P. Ferrara, D. Schweizer and L. Brutschy, “TouchCost: Cost Analysis of TouchDevelop Scripts”, in Proceedings of the 17th International Conference on Fundamental Approaches to Software Engineering (FASE 2014), ARCoSS, LNCS, Springer, Grenoble, France, April 5-13, 2014 (acceptance rate: 26%, MS SE: 29<sup>th</sup>/285, AM PLSE: 32<sup>th</sup>/342)

- [Ferr14]** P. Ferrara, "Generic Combination of Heap and Value Analyses in Abstract Interpretation", in Proceedings of the 15th International Conference on Verification, Model Checking, and Abstract Interpretation (VMCAI 2014), ARCoSS, LNCS, Springer, San Diego, USA, January 19-21, 2014 (MS SE: 34<sup>th</sup>/285, AM PLSE: 8<sup>th</sup>/342)
- [CFCM13]** G. Costantini, P. Ferrara, A. Cortesi and G. Maggiore, "The Domain of Parametric Hypercubes for Static Analysis of Computer Games Software", in Proceedings of the 15th International Conference on Formal Engineering Methods (ICFEM 2013), LNCS, Springer, Queenstown, New Zealand, October 29-November 1, 2013 (acceptance rate: 32%)
- [CFC13]** A. Cortesi, P. Ferrara and N. Chaki, "Static Analysis Techniques for Robotics Software Verification" (invited paper), in Proceedings of the 44th International Symposium of Robotics (ISR 2013), Seoul, Korea, October 24-26, 2013 (CORE: A)

- [Ferr10]** P. Ferrara "Static type analysis of pattern matching by abstract interpretation", in Proceedings of the IFIP Conference on Formal Techniques for Distributed Systems (FORTE/FMOODS 2010), LNCS, Springer, Amsterdam, Netherlands, June 7-10, 2010 (CORE: A, MS DPC: 45<sup>th</sup>/203, AM NET: 18<sup>th</sup>/177)
- [Ferr09a]** P. Ferrara, "Checkmate: a generic static analyzer of Java multithreaded programs", in Proceedings of the 7th IEEE International Conference on Software Engineering and Formal Methods (SEFM 2009), IEEE Computer Society, Hanoi, Vietnam, November 23-27, 2009 (acceptance rate: 35%, MS SE: 76<sup>th</sup>/285, AM PLSE: 104<sup>th</sup>/342)
- [Ferr08b]** P. Ferrara, "Static analysis of the determinism of multithreaded programs", in Proceedings of the 6th IEEE International Conference on Software Engineering and Formal Methods (SEFM 2008), IEEE Computer Society, Cape Town, South Africa, November 10-14, 2008 (CORE: A, acceptance rate: 28%, MS SE: 76<sup>th</sup>/285, AM PLSE: 104<sup>th</sup>/342)

**[FLF08]** P. Ferrara, F. Logozzo and M. Fähndrich, "Safer unsafe code for .NET", in Proceedings of the 23rd ACM Conference on Object-oriented Programming (OOPSLA 2008), ACM Press, Nashville, USA, October 19-23, 2008  
(CORE: A\*, acceptance rate: 28%, MS SE: 4<sup>th</sup>/285, MS PL: 4<sup>th</sup>/168, AM PLSE: 5<sup>th</sup>/342)

**[Ferr08]** P. Ferrara, "Static analysis via abstract interpretation of the happens-before memory model", in Proceedings of the 2nd International Conference on Tests and Proofs (TAP 2008), LNCS, vol. 4966, Springer, Prato, Italy, April 9-11, 2008

#### **International workshops with program committee**

**[BFS17]** E. Burato, P. Ferrara and F. Spoto: "Security Analysis of the OWASP Benchmark with Julia", in Proceedings of the 1st Italian Conference on Cybersecurity (ITA-SEC 2017), Venice, Italy, January 17-20, 2017

**[BSCF16]** Gianluca Barbon, Enrico Steffinlongo, Agostino Cortesi and Pietro Ferrara: "DAPA: Degradation-Aware Privacy Analysis of Android Apps", in Proceedings of the 12th International Workshop on Security and Trust Management (STM 2016), Heraklion, Greece, September 26-27, 2016

**[TPFR16]** Omer Tripp, Marco Pistoia, Pietro Ferrara, and Julia Rubin: "Pinpointing mobile malware using code analysis", in Proceedings of the IEEE/ACM International Conference on Mobile Software Engineering and Systems (MOBILESoft 2016), Austin, USA, May 16-17 2016

**[PTF15]** Marco Pistoia, Omer Tripp, Pietro Ferrara, and Paolina Centonze, "Automatic Detection, Correction and Visualization of Security Vulnerabilities in Mobile Apps" (invited paper), in Proceedings of the 3rd Workshop on Mobile Development Lifecycle (MobileDeLi 2015), Pittsburgh, USA, October 26, 2015

**[BFM14a]** L. Brutschy, P. Ferrara, and P. Müller, "TouchGuru: Integrating Static Analysis with a Mobile Development Environment" (invited paper), in Proceedings of the 2nd Workshop on Mobile Development Lifecycle (MobileDeLi 2014), Portland, USA, October 21, 2014

**[CCF13]** A. Cortesi, G. Costantini and P. Ferrara, "A survey on Product Operators in Abstract Interpretation", in Proceedings of the Festschrift for Dave Schmidt, Electronic Proceedings in Theoretical Computer Science, U.S.A., September 19-20, 2013

**[Ferr08a]** P. Ferrara, "A fast and precise analysis for data race detection", in Proceedings of the Third Workshop on Bytecode Semantics, Verification, Analysis and Transformation (Bytecode 2008), Budapest, Hungary, April 6, 2008

**[Ferr06]** P. Ferrara, "JAIL: Firewall Analysis of Java Card by Abstract Interpretation", in Proceedings of the 1st International Workshop on Emerging Applications of Abstract Interpretation (EAAI 2006), Vienna, Austria, March 26, 2006

#### **Thesis**

**[Ferr09]** P. Ferrara, "Static analysis via abstract interpretation of multithread programs", PhD thesis under the supervision of Radhia Cousot and Agostino Cortesi defended at Ecole Normale Supérieure of Paris on May 22<sup>nd</sup>, 2009.

**Note:**

For each conference and journal publication, the following metrics are reported:

- acceptance rate when less than 35%
- CORE: the CORE ranking (<http://103.1.187.206/core/>) when A\* or A (all others are B)
- ERA: the ERA 2010 journal ranking ([https://research.unsw.edu.au/sites/all/files/related\\_files/regular\\_page\\_content/era2010\\_journal\\_title\\_list.xls](https://research.unsw.edu.au/sites/all/files/related_files/regular_page_content/era2010_journal_title_list.xls))
- MS: Microsoft Academics ranking (<http://academic.research.microsoft.com/?SearchDomain=2&entitytype=3>) when in the top 30% of conferences/journals in:
  - Software Engineering (SE)
  - Security & Privacy (SP)
  - Programming Languages (PL)
  - Distributed & Parallel Computing (DPC)
  - Journals in Computer Science (Journal)
- AM: Arnet Miner ranking (<http://arnetminer.org/page/conference-rank/html/All-in-one.html>) when in the top 30% of conferences in:
  - Programming Languages and Software Engineering (PLSE)
  - Network (NET)
  - Security and Privacy (SP)

<b>Service</b>
----------------

**Co-chair of the 2015 SPLASH Demonstrations track**

**Member of the Program Committee** of the following conferences:

- 18th Workshop on Formal Techniques for Java-like Programs ([FTfJP 2016](#))
- International Conference on Computer Information Systems and Industrial Management Applications ([CISIM 2015](#), [2014](#), [2013](#), [2012](#), [2011](#))
- 18th International Static Analysis Symposium ([SAS 2012](#))

**Member of the Artifact Evaluation Committee** of CAV 2017

**Session chair** at SAS 12

**Organizer** of the IBM Programming Languages Day 2015

**Reviewer** for the following conferences, workshops and journals: SAS 07, FTfJP 07, VMCAI 08, ESOP 08, LCTES 08, FM 09, CATS 2010, ESOP 2010, Journal of Symbolic Computation – Special issue on WING 2009, FMOODS 2010, APNOC 2010, FoVeOOS 2010, ESOP 2011, Journal of Symbolic Computation – Special issue on WING 2010, TOPI 2011, PSI 2011, SAS 2011, ESOP 2012, TACAS 2012, Bytecode 2012, Journal of Computer Science and Technology, Journal of Software and Systems Modeling, VMCAI 2013, ESOP 2013, ICFEM 2013, POPL 2014, Formal Aspects of Computing, CAV 2014, APLAS 2014, VMCAI 2015, NFM 2015, Science of Computer Programming, Computer Languages Systems & Structures – Special issue on VMCAI 2015, VMCAI 2016, ICALP 2016, ESOP 2017, PLDI 2017.

**Reviewer** for ACM Computing Reviews since 2014

**External reviewer** for project proposals submitted to the Swiss National Science Foundation (2014)

**External reader** in the PhD committee of Junjie Chen at the New York University (April 2015)

<b>Grants</b>
---------------

**04/12 → 07/13** Co-principal investigator of the Microsoft project “TouchBoost – Cloud-based Static Analyses to Improve Lay Programming on Mobile Devices”. The goal of this project is to apply static analysis to improve the efficiency and reliability of programs developed on a mobile device with Microsoft TouchDevelop. The project is 2-years-long and involves one postdoc and one PhD student (Lucas Brutschy).  
Funding: CHF 298'000 in total

**09/10 → 07/13** Technical head on the SNF project “Verification-Driven Inference of Contracts” (project leader: prof. Peter Müller). The goal of this project is to explore the interaction between program verification and static analysis in order to effectively find bugs on software. The project is 3-years-long and involves two PhD students (Uri Juhasz and Milos Novacek).  
Funding: CHF 302'896 in total

## Internships

- 20/08/07 →** Internship at Microsoft Corporation of Redmond (USA).  
**09/11/07** Theme: “*Static analysis of unsafe code in C# via abstract interpretation*”  
Mentor: Francesco Logozzo
- 01/04/05 →** Collaborator at Department of Computer Science, Università “Ca’ Foscari” of  
**30/06/05** Venice. Theme: “*Development of a static analyzer for Java Card language*”
- 01/09/04 →** Internship at the Department of Computer Science, Università “Ca’ Foscari” of  
**31/12/04** Venice. Theme: I developed an application to evaluate automatically the practice exams of the “Base of programming” course and I help some students to develop simple C applications in Linux environment.

## Tools and software

- 02/16 –** *Julia for .NET*, Julia SRL, Verona  
**Today** Apply Julia (a 10 years old static analyzer for Java) to the analysis of CIL (.Net bytecode) obtained from the compilation of C# code. Julia has been widely applied to the analysis of Java bytecode. The main challenge is to translate CIL (and in particular, instructions accessing the memory through pointers) to Java Bytecode (that does not support pointers). In particular, CIL is translated into an intermediate XML representation similar to Java bytecode, and this is passed to Julia as BCEL classes.
- 10/09 –** *Sample: Static Analyzer of Multiple Programming Languages*, ETH, Zürich, Switzerland  
**07/13** A generic static analyzer that can be automatically plugged with a wide range of different heap and value analyses [Ferr14]. Several value analyses have been already developed [Ferr10, CFC11, ZFC12, FM12, CFC12, CFC14]. In addition, Sample supports several classical heap (e.g., TVLA [FFJ12] and program point-based abstraction) and numerical (e.g., Apron) analyses, as well as trace partitioning.  
Sample works on an intermediate language (called Simple) simpler than common programming languages, but more refined than bytecode languages. Up to now, translations from TouchDevelop, Scala and Java bytecode to Simple has been developed.
- 04/08 -** *Checkmate: Static Analysis of Java Multithreaded Programs*, Ecole Polytechnique and Ecole Normale Supérieure, Paris, France [Ferr09a,Ferr13]  
**01/10** A generic static analyzer of Java multithreaded programs developed in Java. It is generic w.r.t. the numerical domain, the memory model and the property. It has been instantiated on the analysis of the happens-before memory model [Ferr08], and of the determinism [Ferr08b], together with other more approximated memory models, properties, and a set of well-known non-relational numerical domains.
- 08/07 -** *Static Analysis of Unsafe Code*, Microsoft Research, Redmond – WA, USA [FLF08]  
**11/07** An extension of Clousot (a generic static analyzer of MSIL programs) written in C# in order to analyze unsafe code (MSIL code dealing with pointers).

**09/05 - 06/06** *JAIL: Firewall Analysis of Java Card by Abstract Interpretation*, Università Ca' Foscari, Venice, Italy [Ferr06]  
Tool developed during my master's thesis and the following internship in Java. It analyzes Java Card source code and checks if the applet isolation property is respected.

## Patents

### Pending

- [BFTP15]** L. Brutschy, P. Ferrara, O. Tripp, and M. Pistoia, 2015, "Fine-grained User Control over Usages of Sensitive system Resources having private data with Applications in Privacy Enforcement", U.S. Patent Application Serial Number 14/630,001, filed February 2015.
- [BFTPa15]** L. Brutschy, P. Ferrara, O. Tripp, and M. Pistoia, 2015, "A Method for Synthesizing Mock Inputs that Maximize Program Functionality", U.S. Patent and Trademark Office, filed June 2015.
- [FTPP15]** P. Ferrara, O. Tripp, M. Pistoia, and P. Tsankov, 2015, "FSystem, Method and Apparatus for Application Self and Distributed Fixing", U.S. Patent and Trademark Office, filed July 2015.

## Talks

- 07/04/15** MorphDroid: Fine-grained Privacy Verification, Università Ca' Foscari of Venice, Italy
- 31/03/15** A generic static analyzer and its application to TouchDevelop, Università della Svizzera Italiana, Lugano, Switzerland
- 22/04/14** Safety and cost analysis of TouchDevelop scripts, Università Ca' Foscari of Venice, Italy
- 17/04/14** Hybrid Security Analysis of Web JavaScript Code via Dynamic Partial Evaluation, ETH Zurich, Switzerland
- 16/04/14** Static Security Analysis in an Industrial Setting: from Taint to Data-Centric Analysis, IBM Research Zurich, Switzerland
- 09/04/14** TouchCost: Cost Analysis of TouchDevelop Scripts, FASE 14, Grenoble, France
- 26/03/14** Structural Data Leakage, IBM Thomas J. Watson Research Center, Yorktown Heights, NY, USA
- 12/02/14** Secure Language Design and Program Analysis for Security (with Omer Tripp), Harvard University, Boston, MA, USA
- 22/01/14** Generic Combination of Heap and Value Analyses in Abstract Interpretation, VMCAI 14, San Diego, CA, USA
- 11/12/12** Linear approximation of continuous systems with Trapezoid Step Functions, APLAS 12, Kyoto, Japan
- 15/10/12** Static analysis of multithreaded programs, IBM Thomas J. Watson research center, Yorktown, NY, USA
- 03/10/12** TVAL+: TVLA and Value Analyses Together, SEFM 12, Thessaloniki, Greece
- 20/07/12** TVAL+: Combining TVLA and Value Analyses, Microsoft Research, Redmond, WA, USA
- 13/06/12** Inference of Fractional, Counting and Chalice Access Permissions via Abstract Interpretation, Universidad Complutense de Madrid, Madrid, Spain
- 12/06/12** TVLA and Value Analyses Together, Instituto Madrileño de Estudios Avanzados, Madrid, Spain
- 16/03/12** Automatic inference of access permissions, Department of Computer Science, Università Ca' Foscari, Venice, Italy
- 10/02/12** Access permission inference via abstract interpretation, Microsoft Research, Redmond, WA, USA
- 30/01/12** Automatic inference of fractional, counting and Chalice access permissions, IBM Watson research center, Hawthorne, NY, USA

**22/01/12** Automatic inference of access permissions, VMCAI 12, Philadelphia, PA, USA  
**26/10/11** Static analysis of string values, ICFEM 11, Durham, Great Britain  
**25/02/11** Automatic inference of access permissions, Ecole Normale Supérieure of Paris, Paris, France  
**09/06/10** Static type analysis of pattern matching by abstract interpretation, FORTE/FMOODS 10, Amsterdam, Netherlands  
**08/04/10** Checkmate: a Generic Static Analyzer of Java Multithreaded Programs, Department of Computer Science, Università Ca' Foscari, Venice, Italy  
**04/03/10** Abstract interpretation of memory models, IFIP WP 2.3, Lachen, Switzerland  
**26/11/09** Checkmate: a Generic Static Analyzer of Java Multithreaded Programs, SEFM 09, Hanoi, Vietnam  
**25/08/09** Static analysis via abstract interpretation of multithread programs, IRISA-INRIA, Rennes, France  
**22/05/09** Static analysis via abstract interpretation of multithread programs, PhD Defense, Ecole Normale Supérieure, Paris, France  
**29/01/09** Static analysis by abstract interpretation of Java multithreaded programs, Chair of Programming Methodology, ETH, Zürich, Switzerland  
**18/12/08** Static analysis of the determinism of multithreaded programs, Lunch seminars, Università Ca' Foscari of Venice, Venice, Italy  
**11/11/08** Static analysis of the determinism of multithreaded programs, SEFM 08, Cape Town, South Africa  
**22/10/08** Safer unsafe code for .Net, OOPSLA 08, Nashville, Tennessee, USA  
**20/06/08** Static analysis via abstract interpretation of the happens-before memory model, Ecole Normale Supérieure of Paris, Paris, France  
**28/05/08** Static analysis via abstract interpretation of the happens-before memory model, Lunch seminars, Università Ca' Foscari of Venice, Venice, Italy  
**10/04/08** Static analysis via abstract interpretation of the happens-before memory model, TAP 2008, Prato, Italy  
**05/04/08** A fast and precise alias analysis for data race detection, Bytecode 08 (ETAPS workshop), Budapest, Hungary  
**19/12/07** Static analysis of unsafe code, Lunch seminars, Università Ca' Foscari of Venice, Venice, Italy  
**07/11/07** Static analysis of unsafe code, Microsoft Research, Redmond, WA, USA  
**26/03/06** JAIL: Firewall Analysis of Java Card by Abstract Interpretation, EAAI '06 (ETAPS workshop), Wien, Austria  
**16/02/06** JAIL (Javacard Abstract Interpretation-based lifeguard), Workshop AIDA, Pisa, Italy

## Teaching

**August 2012** Admitted to and attended the course "Teaching at ETH: Committed and skilled"

**Spring sem. 2012** *Static Program Analysis*. Lecturer. 13 lectures (2 hours each one with around 20 students) and oral exam preparation and evaluation.

**Spring sem. 2012** *Analysis and Verification of Programs* (prof. A. Cortesi, Università Ca' Foscari, Venice). Lectures (4 hours) and evaluation of student projects.

**Fall sem. 2011** *Concepts of Object-Oriented Programming* (Prof. P. Müller, ETH Zürich). Teaching assistant. 13 exercise sessions (2 hours each one with around 20 students) and written exam preparation.

**Spring sem. 2011** *Functional Programming and Formal Methods* (Prof. P. Müller, ETH Zürich). Teaching assistant. Exercise sessions and written exam preparation.

**Fall sem. 2010** *Concepts of Object-Oriented Programming* (Prof. P. Müller, ETH Zürich). Head teaching assistant. 12 exercise sessions (2 hours each one with around 10 students) and written exam preparation.

- Fall sem. 2010**      *Analysis and Verification of Programs* (prof. A. Cortesi, Università Ca' Foscari, Venice). Lectures (8 hours) and evaluation of student projects.
- Spring sem. 2010**      *Functional Programming and Formal Methods* (Prof. P. Müller, ETH Zürich). Teaching assistant. Exercise sessions and written exam preparation.
- Fall sem. 2009**      *Concepts of Object-Oriented Programming* (Prof. P. Müller, ETH Zürich). Teaching assistant for 4 exercise sessions (2 hours each one) with around 10 students. Exercise sessions and written exam preparation.
- Fall sem. 2009**      *Analysis and Verification of Programs* (prof. A. Cortesi, Università Ca' Foscari, Venice). Lectures (8 hours) and evaluation of student projects.
- Spring sem. 2009**      *Analysis and Verification of Programs* (prof. A. Cortesi, Università Ca' Foscari, Venice). Lectures (8 hours) and evaluation of student projects.
- Spring sem. 2008**      *Analysis and Verification of Programs* (prof. A. Cortesi, Università Ca' Foscari, Venice). Lectures (16 hours).

### Student project supervision

- 06/2016 - 11/2016** - Supervisor of the master thesis at Università Ca' Foscari di Venezia of Rocco Salvia ("Intent Flow Analysis in Android Application", mark: 110/110 cum laude). Supervisor: prof. Agostino Cortesi
- 10/2012 - 03/2013** - Supervisor of the master thesis at ETH of Zürich of Daniel Schweizer ("Overapproximating the cost of loops in TouchDevelop").
- 03/2011 - 08/2011** - Supervisor of the bachelor thesis at ETH of Zürich of Raphael Fuchs ("Interfacing TVLA and Sample").
- 03/2011 - 08/2011** - Supervisor of the master thesis at ETH of Zürich of Dominik Gabi ("Disjunction on demand").
- 01/2010 - 06/2010** - Supervisor of the bachelor thesis at ETH of Zürich of Roman Scheidegger ("Translating Java bytecode to Simple").
- 12/2009 - 05/2010** - Co-supervisor of the master thesis at Università Ca' Foscari of Venice of Giulia Costantini ("Abstract domains for static analysis of strings", mark: 110/110 cum laude). Supervisor: prof. Agostino Cortesi

### Other titles

- 21/06/05**      Admitted in the Italian Register of engineers
- 21/01/05**      Obtained the European Computer Driving License
- 20/02/03**      Admitted in the Register of journalists as occasional contributor

## Hobbies

- Chess: I am a decent chess player (<http://ratings.fide.com/card.phtml?event=673129>), part of the Battinelli chess club in Verona, member of its governing council, and captain of one of its teams. I have been playing chess since I was a child, and I have been playing for Capablanca club in Mestre (Venice), Paris Université Club in Paris, and Reti Club in Zurich (where I was the captain of one of the teams).
- Mountains: I love skiing and hiking, especially in Dolomiti. [Here](#) you can see my ski performances of winter 2016-17!
- Photography: not yet there, but eventually I'll have some pictures to show ;)
